More About Crater Lake National Park:

- Crater Lake National Park is a dormant volcano located in Southern Oregon
- The lake is 1,943 ft deep and is the deepest lake in the United States and 9th deepest lake in the world
- Crater Lake gets over 30ft of snow in the winter and in many cases this snow is still on the ground in May and June
- Wizard Island is a cinder cone left from the eruption of Mount Mazama about 7700 years ago
